

Query Processing

The screenshot displays the RAG Pipeline interface on a web browser at localhost:3000. The left sidebar shows the 'Query Preprocessing' step selected under 'SEARCH ENGINES'. The main content area is titled 'RAG Pipeline > Query Preprocessing'. It features a 'SYNONYM EXPANSION' section with 5 variations, showing three example queries: '1. "unique health id patient login issue one time password not working"', '2. "unique health id customer login issue one time password not working"', and '3. "unique health id user login issue one time password not working"', followed by '+ 2 more variations'. Below this is a 'PROCESSING METADATA' table:

Processing Time	Token Count	Abbreviations	Synonyms
5ms	7	2	5

A Webex video call window is visible in the top right corner.

Vector search:

The screenshot displays the RAG Pipeline interface on a web browser at localhost:3000. The left sidebar shows the 'Vector Search' step selected under 'SEARCH ENGINES'. The main content area is titled 'RAG Pipeline > Vector Search'. It features a 'Search Query' section with the instruction 'Enter your search terms and find similar test cases'. Below this is a text input field containing 'Validate payment gateway timeout and retry behavior' and a 'Clear' button. Underneath is a section 'Use descriptive terms related to test functionality' with a 'TRY AN EXAMPLE QUERY' button. Below this are several example queries: 'Share Diagnostic Reports with Patients via...', 'Login test cases for the Billing module wi...', 'Validate payment gateway timeout and retry...', 'Password reset flow across web and mobile', and 'High-risk regression scenarios for checkou...'. At the bottom, there is an 'Advanced Metadata Filters' section with a 'Show Filters' button, a 'Results Limit' dropdown set to '5 Results', and a red 'Search' button. A Webex video call window is visible in the top right corner.

Hybrid search:

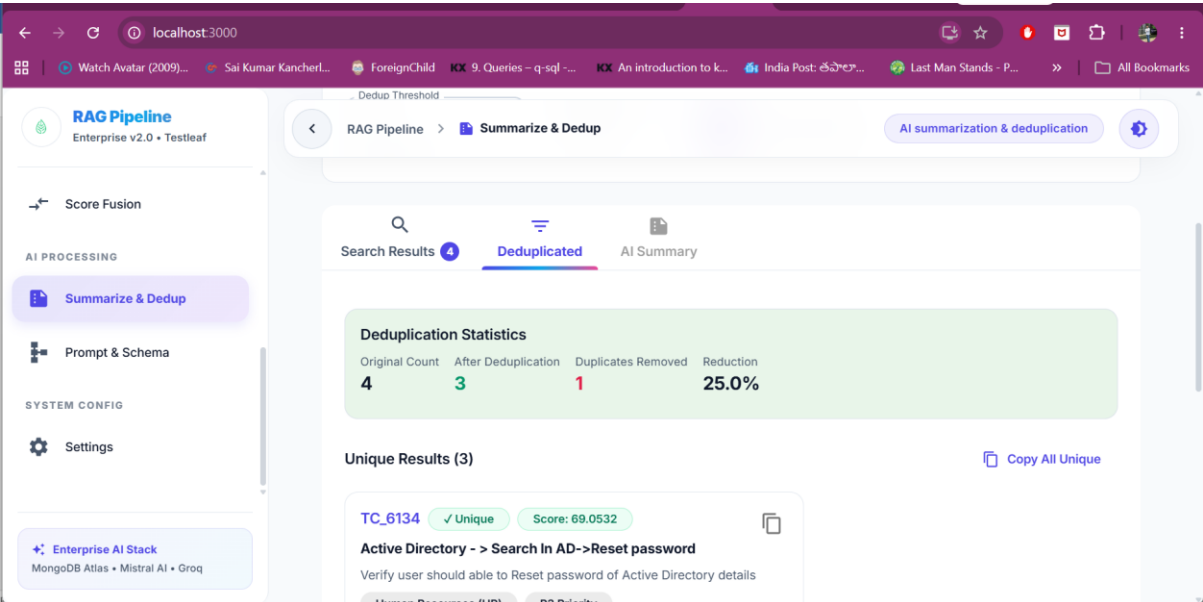

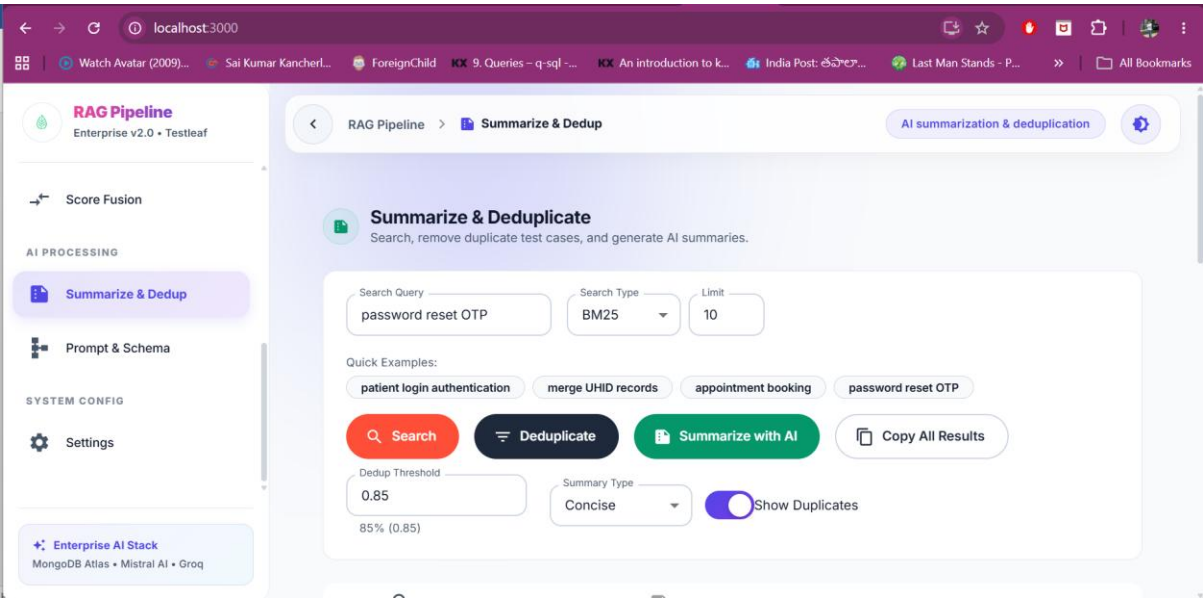

The screenshot shows the RAG Pipeline Hybrid Search interface. The left sidebar lists search engines: Query Preprocessing, Vector Search, BM25 Search, Hybrid Search (selected), and Score Fusion. The main panel displays the Hybrid Search configuration with a search query "Share Diagnostic Reports wi", a results limit of 15, and a search button. Below the search bar, the Search Weights section shows a slider for BM25 Weight (Keyword) at 70% and Vector Weight (Semantic) at 30%. There are three preset buttons: Balanced (50/50), Keyword Heavy (70/30), and Semantic Heavy (30/70). A green notification bar at the bottom right states "Found 15 results (10 in both indexes) in 2041ms".

The screenshot shows the RAG Pipeline Hybrid Search interface displaying search results. The left sidebar is the same as the previous screenshot. The main panel shows the Hybrid Search Results section with a green notification bar stating "Hybrid Search Results: Found 15 test cases in 2041ms". Below this, the Search Results (15) section displays a list of results. The first result is #1 TC_2736 with a Hybrid score of 96.9% and Found in: both. The result details include the title "AHCSummary ->AHCSummary ->Diagnostic & Imaging report", the module "AHC", the patient ID "P3", the risk level "Risk: Low", and the status "Automated". The description is "Verify Diagnostic & Imaging report". The steps are: 1. Launch the application 2. Login to the application with valid credentials. 3. Click on Patient Service Tab and select AHC from drop down. 4. Navigate to Functions -> AHCSummary ->AHCSummary. 5. Select date or Enter UHID/AHC No and click on "Go" button. 6. Click on AHC Number. 7. Click on Diagnostic & Imaging link 8. Observe the results 9. Click on Download or print icon. The expected results are: Diagnostic & Imaging details should be displayed.
