SCRUM-20 - Reports Bb Report Home

Story Title

Reports Bb Report Home

Summary

Reports Bb Report Home

Description

As a user, I want to reports bb report home so that the related functionality works as expected.

Acceptance Criteria

Given reports exist in the system, when a user views or generates a report, then the report should display accurate and up-to-date information.

Additional Info

Any additional information (optional)...

Generated Test Cases

10 test case(s)Model: openai/gpt-oss-120bTokens: 2095

TEST CASE ID	TITLE	CATEGORY	EXPECTED RESULT
TC-001	View existing report displays accurate data	Positive	The selected report opens and displays data that matches the source system records, with correct values, headings, and timestamps.
TC-002	Generate a new report with valid parameters	Positive	A new report is generated and displayed within 5 seconds, showing up-to-date information for the selected criteria.
TC-003	View report when no reports exist	Negative	The system shows a message such as "No reports available" and does not crash.
TC-	Generate report with invalid	Negative	The system displays a validation error message

TC-004

Generate report with invalid date range (end date before start date)

Negative

The system displays a validation error message indicating that the end date must be after the start date and does not generate a report.

TC-005

Generate report for a future date range with no data

Edge

The system generates an empty report and displays a message such as "No data available for the selected period".

TC-006

Generate report with maximum allowed date range (5 years)

Edge

The report is generated successfully within the performance threshold (e.g., under 15 seconds) and contains data for the full 5-year period.

TC-007

Unauthorized user attempts to view a report

Authorization

The system redirects to an access-denied page or shows a message "You do not have permission to view reports".

TC-008

Read-only user can view but cannot generate a new report

Authorization

Viewing the report succeeds, but the "Generate" button is disabled or clicking it shows a permission error.

TC-009

Report page loads within acceptable time under normal load

Non-Functional

The page fully loads (including report list) in ≤ 2 seconds measured by a performance monitoring tool.

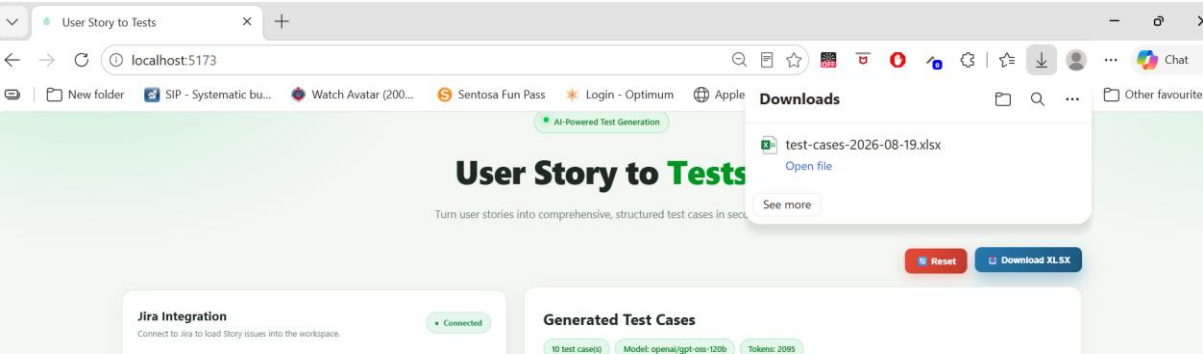

TC-010

System handles 100 concurrent report generation requests

Non-Functional

All 100 reports are generated without server errors, and average response time remains within the defined SLA (e.g., ≤ 10 seconds).

Before clicking on Reset Button

The screenshot shows a web form titled "Select Jira User Story". At the top, there is a dropdown menu with the text "SCRUM-22 - Billing Execution Op Bill" and a downward arrow. Below this, the form is divided into several sections, each with a label and an asterisk indicating a required field: "Story Title", "Summary", "Description", "Acceptance Criteria", and "Additional Info". Each section contains a text input field. The "Story Title" field contains "Billing Execution Op Bill". The "Summary" field contains "Billing Execution Op Bill". The "Description" field contains "As a user, I want to billing execution op bill so that the related functionality works as expected.". The "Acceptance Criteria" field contains "Given valid billing records, when the user initiates a billing or refund action, then the system should process and update the records accurately.". The "Additional Info" field is empty.
